

LAÏLA HAMMOUCH

CYBERSECURITY ENGINEER

0624337391 — laila.hammouch07@gmail.com — in linkedin.com/in/laila-hammouch —
GitHub github.com/LailaHammouch — Web lailahammouch.github.io

State Cybersecurity Network Security Engineer, experienced in SOC, incident detection and response, Vulnerability Management, risk assessment, IT infrastructure security, and remediation. Rigorous, analytical, and proactive.

WORK EXPERIENCE

Devoteam Cyber Trust – End-of-Studies Internship: Cybersecurity & SOC Engineer – MSSP

FEB – JUN 2026

- Designed and deployed a complete internal **SOC infrastructure**, from architecture to production, using **Wazuh**, **SOCFortress CoPilot**, **DFIR-IRIS**, and **Velociraptor**.
- Monitored, analyzed, and handled security incidents, from detection through remediation.
- Collaborated with internal teams to enhance detection rules and developed **AI**-assisted use cases.
- Contributed to **SOAR / CTI** orchestration (**Shuffle**, **MISP**) to automate alert processing.

3D Smart Factory – Engineering Project Internship: Cybersecurity & AI Engineer

AUG – SEP 2025

- Developed an intelligent automated agent designed for proactive incident detection and rapid response.
- Implemented a modular SOC test platform focused on SIEM log analysis, IDS/IPS rule management, and alert correlation.

LafargeHolcim Maroc – Engineering Project Internship: Risk Analysis & Governance

JUL – AUG 2025

- Conducted in-depth risk assessments using the **EBIOS RM** methodology on converged IT/OT industrial architectures.
- Established critical asset inventories, evaluated compliance with security standards, and formulated strategic remediation plans.

CodeAlpha – Introductory Internship: Intrusion Detection Systems

OCT – NOV 2024

- Deployed, configured, and optimized a standalone **Snort IDS** cluster with custom signature rulesets.
- Developed modular Python scripts to parse, filter, and extract indicators of compromise (IoCs) from raw network traffic.

SPECIALIZED ACADEMIC PROJECTS

- Vulnerability Orchestration Pipeline (DefectDojo)**: Automated vulnerability collection, deduplication, and lifecycle tracking by integrating DefectDojo with continuous scans via OWASP ZAP, Trivy, OpenVAS, and Nmap.
- Enterprise Passwordless Platform (FIDO2 & Device Trust)**: Deployed a secure passwordless authentication ecosystem using Keycloak WebAuthn and Passkeys, paired with Osquery compliance checking and log ingestion into Wazuh / ELK.
- SOC Detection Engineering (MITRE ATT&CK)**: Developed advanced detection use cases and custom Wazuh rules aligned with attack tactics, validated through automated adversary emulation tests.
- Deep Learning-based NIDS**: Designed a hybrid CNN-BiLSTM network utilizing a custom focal attention mechanism to accurately classify complex anomalous behavior in high-throughput network traffic.
- Cloud Application Security & Hardening**: Replicated attack vectors on modern web and cloud architectures, performed real-world exploitation tests, and enforced defensive controls using NGINX WAF security rules.

TECHNICAL EXPERTISE

Frameworks & Governance: EBIOS RM, ISO 27001, MITRE ATT&CK, OWASP Top 10

SOC & SIEM: LogRhythm, QRadar, Wazuh, ELK Stack, Splunk, Graylog, DFIR-IRIS

SOAR & CTI: Shuffle, TheHive, Cortex, MISP Platform

IDS/IPS: Snort, Zeek, Suricata, SOCFortress Copilot

DFIR: Velociraptor, Autopsy, Volatility, PEStudio, Cuckoo, REMnux

Pentest: Nmap, Metasploit, Burp Suite, Feroxbuster, Hydra

IAM: Keycloak, LDAP/Active Directory, SSO, MFA, RBAC, OAuth2, PAM, PKI

EDR/XDR: Microsoft Defender XDR, Wazuh Agents

Vulnerability Management: OpenVAS, Nessus

Cloud & Infra: AWS, OpenStack, Docker, Kubernetes

Networking: TCP/IP, OSPF, VLAN, QoS, NAT, MPLS, GNS3

Development: Python, Bash, PowerShell, SQL

EDUCATION

State Engineering Degree in Smart Networks & Cybersecurity – ENSA Khouribga

2023 – 2026

Integrated Preparatory Classes – ENSA Khouribga

2021 – 2023

High School Diploma in Physical Sciences – Ibn Khaldoun High School

2021

CERTIFICATIONS

- TryHackMe – SOC Analyst Level 1 (**In Progress**)
- Hack The Box Academy – Vulnerabilities Assessment
- Cisco Certified Network Associate (CCNA v7)
- Cisco Certified CyberOps Associate
- Introduction to Cybersecurity – Cisco Networking Academy
- AWS Academy Cloud Foundations
- Python 3 – Hack The Box Academy
- Fortinet Certified Associate (FCA) in Cybersecurity

LANGUAGES & KEY SKILLS

Languages:

- Arabic (Native)
- French (Fluent)
- English (Fluent)

Soft Skills:

- Analytical Thinking & Rigor
- Complex Problem Solving
- Teamwork & Active Listening
- Continuous Technical Curiosity
